PROFESSIONAL SUMMARY

BCA student graduating in 2027 with strong communication, problem-solving, analytical thinking, and computer skills. Experienced in building and presenting technology projects that require structured problem resolution, attention to detail, documentation, and teamwork. Comfortable learning new processes, working with digital tools, and communicating technical information clearly. Seeking an entry-level customer service opportunity in a professional B2B environment.

CORE SKILLS

- **Communication:** Clear written and verbal communication; structured explanation of information
- **Customer & Client Focus:** Understanding issues; professional communication; resolution-oriented approach
- **Problem Solving:** Analytical thinking; troubleshooting; structured issue identification and resolution
- **Computer Skills:** Python; Java; JavaScript; SQL; React; Node.js; REST APIs; PostgreSQL; Git/GitHub
- **Documentation & Analysis:** Technical documentation; data analysis; dashboards/reports; attention to detail
- **Teamwork:** Collaboration; adaptability; learning new workflows; responsibility and follow-through

RELEVANT PROJECT EXPERIENCE

ECHO — AI Emotional Companion

React • Node.js • Express • PostgreSQL • Web Speech API • LLM/TTS APIs

- Built a conversational AI application focused on natural, real-time interaction and user experience.
- Designed structured conversation workflows and user-state features including memory, journaling, and mood tracking.
- Worked through technical issues systematically and translated complex functionality into understandable user-facing flows.

CYBERCCTV — Security Monitoring & Incident Analysis

Python • FastAPI • React • Log/CSV Analysis

- Built a monitoring platform that processes logs and CSV data and converts them into incidents, alerts, dashboards, and reports.
- Applied structured analysis to identify security issues and classify incidents by severity.
- Focused on clear documentation and presentation of technical information for faster understanding and action.

SECUREASSURE — AI-Powered CCTV Surveillance

Python • YOLOv11 • ByteTrack • ArcFace • FastAPI • OpenCV

- Developed a real-time monitoring system for detecting and tracking security-related events.
- Worked with multiple components and troubleshooting steps to maintain reliable detection workflows.
- Collaborated on system design and converted technical requirements into practical implementation.

EDGESAGE — Offline Edge-AI Disaster Intelligence

ESP32 • Vector Embeddings • Offline Retrieval • Mesh Networking

- Designed an offline AI assistant for accessing emergency information when internet connectivity is unavailable.
- Worked with structured knowledge storage, retrieval, and constrained hardware workflows.
- Focused on reliability, clear information delivery, and practical problem solving.

EDUCATION

Bachelor of Computer Applications (BCA) — Institute of Information Technology and Management, Janakpuri
2024–2027 | GPA: 8.4

Senior Secondary (Science) — Deepanshu Public School, New Delhi

ADDITIONAL INFORMATION

Open to Noida/Gurugram locations • Comfortable with technology-driven work environments • Interested in customer-facing and business-process roles
